

PRESS RELEASE FOR IMMEDIATE PUBLICATION

## Seldén Double Fairlead

The Seldén Double Fairlead makes for a quick and easy set up of the gennaker or Code 0 furler. As these furlers are always handled with an endless furling line, spliced together in a continuous loop, ordinary blocks cannot be used to lead the line back to the cockpit. Seldén Double Fairlead consist of a composite bracket fitted to a 25 mm or 30 mm stanchion and a spring loaded "push-and-twist" bale in stainless steel. Easy to open to attach the line and just as easy to close. The Double Fairlead prevents the line to get tangled up and the smooth stainless bale prevents friction. Recommended retail price is €50 excl VAT. Seldén part number is 480-501-01R.
